

REMARKS

This preliminary amendment amends the Specification, Claims, and Abstract as specified above. The amendments to the Specification add a claim of priority and several headings to improve the readability of the specification. No new matter has been added.

Annexes, attached herewith, filed for the parent PCT application in response to the International Preliminary Examination Report contain amendments to the specification and the claims. Applicant requests that the amendments to the specification, as made in the Annexes, are not to be examined for this National Stage filing.

Claims 1-69 were originally presented in the application as filed. The Annexes filed in response to the International Preliminary Examination Report include claims 1-57 with amendments. The above Amendments to the Claims include claims 1, 2, 3, 29, and 30 from the Annexes. The remaining claims have been canceled to eliminate multiple dependencies and to improve the clarity and readability of the claims. None of the amendments were made for reasons of patentability. All of the claims are fully supported in the application as filed and no new matter has been added.

Applicant respectfully requests entry of the above-amended claims for this application. If the examiner has any questions regarding the foregoing, or if the examiner feels that a telephone interview could expedite examination of this application, the examiner is encouraged to contact Applicant's undersigned representative at the phone number listed below.

Respectfully submitted,

Date June 9, 2006
